The Advance hesbing Machinery.

and a machine that stands without a rival. The ADVANCE 'Thresher has NEVER been REPLACED' by any other machine on the Coast, but has replaced several others that HAVE FAILED to fill WAR-HANTEE. Why get some OLD STYLE machine because it is cheap when you can get an ADVANCE on the start and do good work in any kind of grain. You do not have to cot and try with the ADVANCE, but start your power, then commence threshing at once. I take the liberty of referring you to the following parties owning ADVANCE Threshers (without their knowledge): Dr. H. A. Davis, Harrishurg, after wasting much the season trying to run a cheap machine, bought an ADVANCE and averaged 2205 bushels perfectly. M. F. White & Co., Dixie, same experience, but after getting an ADVANCE aweraged 2046 hushels per day. Henry T. Bold, Spangle, writes, after trying a machine averaged 1550½ bushels per day. Henry T. Bold, Spangle, writes, after trying a machine the best part of the season bought an ADVANCE. Was then able to run, without a blackamith and carpenter shep. The ENGINE is guaranteed to pull more than any other, and will outravel all others out the road. If you bear a macnine that stands without a rival.

ADVANCE Thresher has NEVER. penter shop. The ENSINE is guaranteed to pull more than any other, and will outtravel all others on the road. If you hear any loud boasts, please tell the parties the ADVANCI THRESHER and ENGINE are sold on their ments entirely. And an willing to prove all I claim in any field at any time. De not be humbugged by me any time. Do not be humbugged by buying any machine until you see the ADVANCE. I also handle steam fitting goods iron pipe, aundry machinery and many other specialties. Send for catalogue of what you want.

His Bonds Fixed at Twenty Thousand Dollars.

THE EVIDENCE IS INSUFFICIENT

Appearances New Reem to Indicate That There is a Conspiracy Against the Irish Leader -The Clau-as Gael.

CHICAGO, June 14.—Alexander Sullivan was to-day restored to liberty by Judge Tuley. The re-lease was the immediate result of Sullivan's ap-plication for a with of subcase corpus. The bail was fixed at \$20,000, and was promptly faculated

pleasing for a with of habons corpus. The hall was fixed at \$50,000, and was promptly farmished by four wolk known citizens, each of when represented many tisses the detail amount asked. Sullivan wasked out of the count after having been less than three days in castedy.

The judge hald that the corpust's jury had been less than three days in castedy.

Soldom, if ever, has a case drawn such a crowd as that which assembled this afternoon to hear the expected decision. The court room was lammed, and a hig concourse of mos was assembled in the corridor adjoining seeking to catch from far the words from the judge's lips.

Attorney Longenceker and his assistant, Mr. Baker, were in consultation with Judge Tuley before he cains on the bench. Ecveral takenown non also entered this chamber. They were presumably members of the coroner's jury who resurably members of the coroner's jury who resurably members of the covener's jury who recorded with him through the judge's chamber before the results and the property was a second with him through the judge's chamber before the results and the property and the results.

caped with him through the judge's chamber bu-fore the chancellor's arrival.

and (riendly interest in lift cultural processes.
Coroner Hertez occupied a seat by Judge Longenecker, and Congressmen Frank Lewier came in when everybody had get seated calling from the joular Trude the observation? "Law-ler is here; now let the proceedings begin," There was a wait of the check that hour before Judes & P. M., he ascended the bench rith a written opinion, which, it soon became apparent, had been under only after a careful analysis on the whole mass of testimon, in the case, and tot, as at first supposed, merely that relating to Sullivan slone.

sommyon at the whole mass of testimony in the ones, and be, as at first supposed, morely that relating to sulfivan alone.

Sulfivan braced thamelf in his chair and kept, his cyes fixed on the court as Judge Tuley and;

"I suppose that there will be no further steps taken boyond the evidence before the coroner's ther."

Mrs. Couklin and Semilan testified that, they had beard dronin say that there was a plot in assassinate him, and that Sullivan was back of 12. Barry, Morris and O'Brien testified substantial y to the same thing, the list-named substantial yields.

summitism, Neuralgia, Gout, Catarrh, Scrofula, Tumors, Salt Hassum and It invigorates the Stokach, Liver and Bow-cas, relieving Dvasersta, indioestics and Con-rityation. It resions the Appetite, increases and hardens the Fleat. The attnotates the Liver and Kidners of requiry socion, Publicas via Blood and Brav-tsyrbs the Complexion.

itting magistrate: It was shown by the evidence that faultivan was prominent Irlah hationalist; that the "triangle"

passession fived after his doub. The goroner had been unable to find any trace of any proceedings in any camp to condemn him to death. Another licery was that Je was removed because he was a British spy. If Cronin was removed by the United Brotherhood, it could not be seen how Sullivan actuated it, since he had not been a member for several years. The evidence didn't show that Sullivan has any relations, social or otherwise, with Coughin, Sullivan, the iceman, or Woodruff, or that he had not them, or that there was conspiracy.

The coroner's jury was largely influenced by outside sendance. There was no doubt that the suspicion egainst Sullivan was strong. That he had felt a bitter and muliganis hasted founds from the first of the first of the subjection of the subjection of the subjection of the beauty of the could have promulganged to take the Buffalo trial, in which he branched Cronin as a secondard and a perjurer. No imparity man could believe it possible for a lary to centric the livan on the evidence present ed.

"An uny instantion sequence of the first of the second it there," said the for, jury to centric the livan on the svidence present ed.

"An uny instantion sequence of the stayer of personal there," said the fort, jury to centric the livan on the svidence present ed.

"An unit is not hear that ounselve the greater of personal there," said the fort, jury to centric the lives of the smoont."

Supposition of the stayer fruite thought would be supposed to the conduction of the stayer of personal the heart of the stayer of personal the supposed of the total stayer of personal the supposed of the total stayer of personal the supposed of the total stayer of personal the supposed of the suppos

State's Attorney Longenecker suggested ZZ,000 buil, which Lawyer Trude throught would be stressive.

Longenecker said that he would consent that the buil should grazain as fixed, provided the indictaneous were found-on no other evidence than that already before the coroner's jury. If additional verticant were introduced, he would reserve his right to secure a capies and then settle; the question of additional vall.

NEW YORK, June 14. The habeas corone cases of John? I, Marousey and Charles McDorald, came, or this inversity. McDorald's counsel said his client's employer was in cot it prepared to show that the brisoner was at work in this city when the Gron in marder was committed. There was also a gootleman present who slept with McDohald in New York that night.

Maroncy's counsel declared that if e warrant was not properly issued, and his client was not regularly committed. The ovidence, he continued, was such that no judge would countenance a continuance of Maroney's longerwoment. Judge Andrew said he would have to have a written extern to the writs.

The connect then agreed that the matter should go over until to-morrow.

THE BROOKLYN CLAN-NA-GARL

The Details of Croniu's Murdor Thought to Have Esca Arranged Thought.

New York, June 14.—Thee Chicago detectives, connected with the Pinketon agency, began an investigation into the Clanna-Geal allules in Brookly sesterday. According to the Fagle, of that city, they are of the opinion that at least one of the nice who murdered Troniu cause direct to Brooklys from Loudon, and that the details for Cronius a removal were arranged by the Clasma-Gael men in that city. OPINION OF MARONEYS FRIENDS.

They Peclare That the New York Arrests Were Made Merely to Injure Sulliyan. 

rison will not appoint him to public office. They alloge that Dillon's actions are directed from New York city, and that John Devoy is engineering the movement, which is now bringing odium on the Irish organizations.

ANOTHER SUSPECT ABRESTED.

There are runners of many stiachments, amignments and banken prey proceedings among some of the dearlier and going absale with their business of the complete and going absale with their business of the comparary quarters.
The edge of the bay in front of the city is full of floating debris, timber, they, stee, much to the annoyance of vessels.

An ILLICIT SALOON RAIDER!

SEATTLE, June 15.—A rather nest capture was made by Captain E. M. Cerr this morning, and the studie whisky joint, which has flourished despite the vigilance of the authorities was pulsed.

Captain Carr was met about 11 o'clock by a special policeman, who told him.

ner Third and James, just as the special was raising a glass to his lips, J. H. Long-head, M. A. Treton and T. E. McLaghlin of the salono, and C. P. Mallorr, proprietor of the house, were arrested and their whole stock of spirituous iquors confiscated and taken to the armory.

SEATTLE, June 14.—The general relief committee will take charge of the Tacoma rolled bureau tomorrow. The Tacomans have been sit along wills as coke of provisions and cooking appearance, wheneve the bearing to release the direction of their tent, whils slock of provisions and cooking appearance, wheneve the bearing to take had the provision made for the cities of the reedy, and the munificence of the cities of the Paolite coast, has prevented a great mount of suffering.

The number of people who apply for food at the acmosty and at the Tacoma tent does not decrease, nor six likely to for same time to come.

So far evidence has led to the belief that four persons loss their lives in the famous. Strange to say, no one is positive as to the isentity of any of them, and no persons are hunting relatives supposed to be lost in the fire.

A clack for skie was received by Judge Lewis, chairman of the relief committee, limit night, THE WORK OF RELIEF.

five indictments this afternoon. One is against
Frank Leuterle, deputy county auditor, and
charges him with having fraudulently presented
a warrant on the county treasury for \$560.
Lauterio was arrested, and ball fixed at \$2500.

Death of an Ared Odd Fellow, CHICO, June 14.—W. J. Leanin, of this place, died to-day. He was about 83 years old, an I was said to be the oldest Odd Fellow living, being a charter member of the first louge organized in this country, by Wildie, at Baltimore, in 1319.

Personal.

San Francisco, June M.—George J. Ainsworth and family who knye been sujoirtaing in Los Angeles, have returned for a short stay at their home in Cakland. They contemplate roturning simost immedia cly to the Southdra country.

The Majrety of the law.

San Francisco, June 14-T. Refordard, of
East Outland, has been committed to the county
juli for ten days for jumping over a fence into a
neighbor's orehard and helping himself to 40
conts' worth of green fruit.

Wheat Fields on Fire. Whene Field first are now burning a few miles to the southeastward of Merced in the midst of large wheat fields. The precise locality cannot be ascertained. The damage will probably be very great.

Died From the Effects of Aumenia. Son Francisco, June 14.—Mrs. J. E. Stelly died this all armoon from the effects of amount taken by mistake. She had been sick and during the absence of her muse took the fanal does

Fanoral of Lieutenant Heath.
Vallerd, June 14.—The funeral of Lieutenant
Frank Heath, late of the United States steamer
Vandalia, will take place at the Mare island navy
yard, at 2 T. M. to-unbrow.

Fire at Grass Valley.

Grass Valtr, June 14.—A fire this morning flestroped several buildings, including the post-office, and damaged several others. The loss is \$15,000; neutanov. \$41,000.

Transpartation of West.

Redding, June 14.—The teaming is very heavy to and from Modec county, Lakeview and Bouthern Orgon points, Much wool is coming forward.

em Oregon points. Much wool is coming for-ward.

New York, June 14.—The Nord Doutch Lidyd's stemmer Sande, which striped hern at 8 o'dlock last evening, had a barrow escape from a bugs it ober, stemmer Sande, which striped hern at 8 o'dlock last evening, had a barrow escape from a bugs it ober, she ran fairly on the submorged jost of a floating mountain and sid off. If was in the dead of night, and na fog, when auddenly her tights and sounds were suddenly reflected from a wait of ice. The lechers is directly in the track of occan steamers, and fears are depressed that the City of Paris, the Allen and outer mean grey-hounds may not escape so providentially.

Two Nogroes Bycowied.

Browshyller, Tenn., June 14.—The well-known negroes, Dan Springfield and Bob Tallaforte, were drawned to-day in the Hatchie river by the overturning of a kilf.

THE CAUSE OF THE TROUBLE.

The cause of the Rouble.

The as been said that the rupture in the republican raphs is due to lay ambition to be chief of police. I have never made an effort to be appointed to that office and neither myself one any one having my authority has asked ethier Commissioner Simon. Frank or Cardwell to make me chief of police. I do not say that I have not take the office if I ownle get it, but I have not take the office if I ownle get it, but I have not take the office if I ownle get it, but I have not take the office if I ownle get it, but I have not take the office if I ownle get it, but I have not be not possible to the commissioners perpetual officeholds of the police commissioners perpetual officeholds than we to him. It we had not food in with him has June and if it had not been that there was a United States sension to elect, Mr. Simon would have been showed under. As it was, he say 220 votes behind his ticket."

Mr. Theodore Wygant said yesterday that the use of his name in connection with the police commissionership on a citizens' these transitorized. He would most certainly not be a candidate.

A NEW SEWEE DISTRICT

A NEW SEWER DISTRICT Is To Be Created, Including That Part of the City Bouth of Porter Street.

A new sewer district is to be created, including that portion of the city south of Porter street.

A new sewer district is to be created, including that portion of the city south of Porter street.

A portion will be presented to the council shortly asking for a hig main sewer as a sort of artery for this system, to start at Front and Lane street and run down the gulch to Williamette to the city of the city. This sewer will provide an entite of the river. This sewer will provide an entite of the river. This sewer will provide an entite of the river. This sewer will provide an entitle for the sewers of the entire district, which will be connected with it. It will be on a par with the Marquard's gulch sewer, the Tanner creek sewer and the Johnson creek sewer when it is built, along I wenty-first street are bringing all possible pressure to bear to secure it.

There has been a proposition made to the council to have the bollom of at least a portion of this Johnson creek sewer laid with stone blocks, on the sewer will were out a brick bottom. This is consistent will were out a brick bottom. This is consistent will were out a brick bottom. This is consistent will were out a brick bottom. This is consistent will were out a brick bottom. This is consistent will were out a brick bottom. This is consistent will were out a brick bottom. This is consistent will were out a brick bottom. This is consistent will were out a brick bottom. This is consistent will were out a brick bottom. This is consistent will be a sewer be and the sewer in and they be be observed to sever the out they are a brick that the present of the sewer in and the council will hardly delay the matter bottom. The residents along the creek ary much an up. of the council will hardly delay the matter bottom.

SCHOOL BOARD MELTING. Contract Let for Wood-Bills Audited and Ordered Paid.

The regular monthly meeting of the school board was held at the High school building last right, all members, with the exception of George of gitt, all members, whit the exception of ecouge
It but han, being present.
On motion the reading of the minutes of the
last meeting, as well as the reading of applications from teachers, was dispensed with. All insurement hills were ordered pand as soon as they

YESTERDAY'S BENEFIT.

Mr. John Cort and J. P. Howe Swell the Fund for the Seattle Sufferers.

The promotors of the benefit performance ten-tered to the Seattle sufferers at the New Park

ment of affairs, and the thirry-one artists who took part.

The three Franklins, Miss Lillie Morris, the Gottlobs, Beattle and Beatley, the Tudors, Eddie Silbon, Coyne Bros. W. J. Morton, McAvoy and Rogeis and Miss Alice Hamilton deserve especial credit for the neat manner in which they acquitted themselves.

The performance was in every way a refined one, and greatly interested the audicince. All who took part volunteered their services, so the net receipts, which amounted to in the neighborhood of \$100, go to the Seattle sufferers.

HE GIVES THE NAME.

East Portland, Jine 13.

To the Editor of the Orgonian:
In your issue of the Orgonian:
In your issue of the Orgonian:
In your issue of the date you publish an article in which a man, of whom, be it said, better things might have been expected, is quoted as having so far forgotten himself as to brutally beat the brains out of a little pet dog belonging to Mrs. Crischild, of Hellanday's addition, East Portland, simply because it deted to bark siter him, and, still worse, use rude and ungentlemanly frontment to the last of the country of the c EAST PORTLAND, June 18.

M'MINNVILLE COLLEGE.

The commencement exercises of this college were held this week, beginning with sermons on Sanday by fiev. D. T. Richards, of Hills soro, and Rev. J. A Reed, of Oregon City. Money night was the second annual exhibition of the Philorgian society. The exercises were by the students and were excellent. Tuesday night was the educational address, by Rev. John Gordon, D. D., of Portland, and defending afternoon was the annual relation of students, and in the evening the graduality it has been by considerable the best year of the college. The regular income has more than met all regular expenses. The trustees decided to add another teacher to the faculty. DON'T FAIL TO SEE HIM.

The prince of the serisible wire. Eddie Silbon, who is unquestionably the most darting and the most finished wire walker that has ever a specard in this city. Direct from the Orrin Brothers' cit-cus, City of Mexico. Will give a grand exhibition to-morrow attenuous at he red mon's picnic in the Gambrinus garden.

Rochester Herald, "Old Hutch" of Chicago never gets anything his a fo-cont alayo himself. The high-priced shaves the otner fellows get, and "Old Hutch" is the barber.

MME. MODJESKA.

Shakespea-e's Beautiful Pastoral Play, "As You Libn Lt" With This Charming Astress

Never was greater injustice done to an artist of Mme. Modjeska's powers and the company of capable players supporting her, than to place them on a contracted stage in such an immerse hall as that in which they appeared hat evening at the Exposition building. It was absolutely excelled the few who occupied the first initiative rue, both to the antience, which, for the size of the hall, was large, and to the company, for, excepting the few who occupied the first initiation rows, it is to be deubted whether and in 1 the antience could except the hall, was large, and to the company to hear the lines as well as see the action of this exquisite erreation of the master hand, the pleasure was great. Mme. Modjeska is, in all points admirably equipped to easily the role of Mosalind, and the praise that has been bestowed upon be graceful, inteligent acting of the part has not been mispleced. There is a winning charm about her voice, in exquisite modulations, that its well with the lines sie has to speak and she scents to have exquisite the true spirit of the idylic character.

With an art (bat is perfect in its elaboration she

have caught the true spirit of the idylic character.

With an art that is perfect to its claboration; she depicts all the changing phases of the ma due's capticious teing with a fidelity to nature that it simply delightful. Nothing could be neater than her acting in the scene with Celia after the discovery that Orlando is in love with her, and the succeeding scene with Orlando, wherein she makes him reheare his love for Rossilad was most oxquisite bit of light conedy acting. Indeed, so even and well sustained throughout was her characterization that it is difficult to since out any one scene a being more artistic thad autone. The true artist is seen in overything that alse does.

The supporting company is fully worthy of the

othe. The true artist is seen in overything flust she does.

The supporting company is fully worthy of the star and ably seconds her work. It can residily be seen that they are well up in the domands of Shakapenisen derans by the win ju which they apeak the r lines. Mr. Lawrence Hanley was a very capa sle Oriendol, and speke his lines with a distinctices of our uciniton very agreeable to the car. He Lawed somewhat in arbor, however. Mr. John A. Lane as the melancholy Jacque et al. He lacked somewhat in arbor, however. Mr. John A. Lane as the melancholy Jacque et al. Hull Justice to the cale. He necessed a round of appliance on his "even ages" speech, which was spoken with due effect as Cella, Mrs. F. M. Bales around the support of the captivere admirable in their respective rounds of the captivere admirable in their respective rounds. Mine. Medjeskin received several currain cells doring the flust. Made Adoo About Nothing" will be Mine. Modjeskii received several furthin calls doring the play.
To-night "Much Ado About Nothing" will be given with Modjeska as Beatrice.

PIONEER ASSOCIATION NOTES. Owing to temporary illness of George H. Durham, esq., grand matshal for Pioneer day, and absence of Ron. E. P. Thompson, the final meeting of the execut ve committee for the pioneer retuion was not beld last Thursday sight. It will take place to digit at Commercial National bank, and a full programme will be a required to the force of the place of the power of the place of the pl

pioneers.

Joseph Watt, president of the Oregon Ploneer
Association, came down from Amily yesterday,
Illa belongs to the '44 class, and is chuck full of
rich experiences in pioneering. The great vegetable substitute for pills is Simmons favor Regulator.

Pullman reservations made for all points East via the Northern Pacilic Railroad, Office, No. 121 First St., corner Washington,

DR. DARRIN RETURNED.

What the Astoria Pioneer Thinks of Him-Dr. Harrin's sojourn in Astaria has ex-pired at d he has returned to the head office in Portland, where he is permanently lo-

onted. The visit of Dr. Darrin to Astoria is filled.

When he first artived he advertised very extensively, and the cry wint up that there was some catch in it. Then he cured one case that was considered hopeless, and a surprise was felt. After that the very worst cases in elistence were given him as a test by all doubters. If he cures this one I will believe it, the doubters echoed, and after trealment the nation was a do lar. Then they gave him another test case, and another, and so on, but all with the same result. He effected a cure in nearly every instance. Then the doctor's terrible rush of patients began, and the strength is been growing larger every day, numbering some of the best people in the strength as been growing larger every day, numbering some of the best people in the state. A visit to the offices of Drs. Parrin is certainly a curiosity as well as a wonder. Patients are carried one day, and in a week's time, instead of being carried there, they walk up the stairs as sprightly as young boys. What there is about them is certainly mysterious for they have performed raost remarkable cures, as the testimonials that we have herelofore published have proved, and we give the names of the following as further proof-

Andrew Anderson, Port Townsend, W. T., cross eyed from paralysis of the outer muscles of the eye; cured by one operation. F. P. Sawtell, Independence, W. T., dyspepsia and kidney complaint, pronounced Bright's disease by some physicians; restored.

Mrs. L. K. Harman's son, of Vancouver,
W. T., cured of a ionthsome case of catarrh
and polypus of the nose; also her daughter

of a turnor.

C. Illese, seven miles west of Fulion, Or. liver and kidney trouble, dizziness and pains over the whole system; restored to nearth.

Charles Bragger, Redwille, Or., almost total blindness from the effects of measies, restored after other doctors said he was past

Mrs. L. Mattoon, East Portland, Or., ca-Mrs. L. Mattoon, East Portland, Or., catarri, pronchits, nervousness and sleepless nights and loss of tiesh; cured and gained twelve pounds.

Mrs. A. J. Quentel, 1361 Railroad street, Theonia, W. T., stoppage of tent duer, causing tears to overflow down the cheeks; cured by one-operation.

Mrs. Mevic Gebiort, Senttle, W. T., boy 5 years old, deaf since 15 months old, discharging ears and catarri; entirely cured after several treatments.

after several treatments.

Jue Doctor's Pince of Business.

Dr. Darrin can be consulted free at 235

Fifth street, corner of Main, Portiand, Office hours, from 10 to 50 clock daily; evenings, 7 to 8; Sundays, 10 to 12. Al curable chronic discases, loss of manbood, blood taints, syphilis gleet, gonorrhem, stricture, spermatorrhos, seminal weakness or loss of desire of sexual power, in men or woman, catarrh and dealness, are confidentially and successfully treated. Cures of private discases guaranteed, and never published in the papers. Circulars sent free. Most cases can readize home treatment after a visit to the dector's office.

The doctor has no representative practicing in the state, as has recently been discovered in Banton county. Al persons taking the name of Dr. Darrin are frauds.

idusiral Poster, in a statement just pubwith a design of urging upon our own govn in the Northwest. He says: movements of the British governstrengthening their naval denot at ling the Strait of Foca, indicates a poly astagonistic to the United States, viz: entended for the Strattof Rosario as a idary instead of the Stratt of Haro. d have given them the constand ob the British have a prominent pos sound unless we are willing they These great inland waters on a better position for delensive form a half-way house between Califor-

ne. Wist Admirol Porter says further is idenially true, vis: "Great British has a sat preponderance along the whole line to id blaced at her mercy is the magnificen of islands, inlets, bays and rivers los

These are arguments for construction in proper system of fortifications about dialrait, inlet and Pugel sound. By simisents defenses at the entrances of al city of the Pacific coast, is of paramount tance; so that any system of fortifica rruled. As Admiral Porter says: liv.conipped, with small yearly appropria d many years ago, is not completed."
o says that inopractical man with our
tknowledge would think of building v dock, where timber, was abundst coast is amply supplied with stone quarries from which the baildings could be orected and sill the uniterials brought by water directly to the size of the many yard. It may now be regarded as many yard and dry dock will be constructed at Ruget sound; and constructed at Ruget sound; struction of these will be attended, or fol-lowed, by the erection of fortifications at suitable points. The subject is one which must soon receive national attention.

# AN IRREPRESSIBLE SCONFLICT.

United States is making preparations to press upon congress an act to restore the wool tariff of 1867. hast year in their naonal platform the republicans made this be adjusted and maintained so as to furh full and adequate protection to that in-

of the North and West and the manucome only by the unexampled ma ties in the rural districts. The election decided in Northern New York, where facturers in Northern New York, and throughout the North and West, united very lly with the producers of raw mat rings on the ground that the interests of all

rials, and the producers of raw materials will more and more resolutely oppose the assumed. One thing that the manufacturers ought to see is certain, namely, that free wool means free goods—that is, if the woolgrower is not to have protection, the manu-facturers cannot have it.

# "A SPORTSMAN'S PARADISE."

that when the lake came into the posses-sion, some five years ago, of this club the wante gates were closed to prevent the ex-ston, of the game fish with which it was stocked.

The first reports of the disaster hinted at a convulsion of nature, as the only possible power that could loosen the wast body of water, so strong and so scientifically con-structed was the wall of masonry that held it. Personal investigation has shown that there was no masonry in the construction of the dam, nor any engineering worthy of the name. It was simply a gigantic heap of carth, drupped across the course of mane. It was simply a giganot heap of search, dumped across the course of a mountain stream between two low bills. It was faced on two sides by a layer of rough slone, uncentented. The fill of earth was seventy-five teet high and minety feet was seventy five teet high and mnery rec-thick at the base and was leveled off to twenty feet at the summit. It was built straight across the gap, neither face nor back curved. Is original purpose was to create a reservoir for the Pentsylvania canal, and when word for this purpose waste gates were main-tained through which at any time the pressure upon the dam could be relieved. These waste gates were permanently closed when the property was leased by the sportanion's and, property was tensor of and sportsman's chalifive years ago, and for several years pactable immense body of water has been partupentale mountains a maken to the morely, the homes and the industries of the ingrow, railly, which it so recently devasta-ted.

contemplated the possibility of a disaster so partible resulting from the insufficiency of the barrier. Tolleed, it is not likely that they gave any thought or care to the matter. Their aim was to have a pleasant outing ground, a "spontemant's pragdise." The dam had stood for years; they trusted to chance that it would sland the strain for years to come. Public incligation is not the less bitter against them on this account, however, sincoit is criminal for men rot to think in the presence of such a deadly unage. The feeling against themis succeedingly bitter in the mountain district, where the size of the the mountain district, where the site of the late "sportsmants pursatise" is marked by a magnificent club house, the gay cotylers of individual members of the association, a great basin of ooks and street that 'chiec was naugh lake and a towering mass of

It is safe to assert that this dam will never be repaired, nor the trice recreated. More than this, public apathy is not likely again to compound with and widual sellisances in permitting and malatat ting, for purposes of lement of destruction within the borders of

rich spot of earth along the lake and mountains of that name, and covering enough of open land to make them rich as farmer when they choose to blow and sow and reap.
Old Sultere, their chief, rides in a carriage
and issues proclamations to fite world in a very different style from that he assumed a little over thirty years ago when he rede at the head of his warriers in pursuit of Colonel Steptoe. They produced a good deal of when some years ago. It is their hoast that the tribe has always been pencephie, and refer-ence to their history shows that they were from an early date under the care of the Catholic missions and have been considered the most civil and well senarca true through their ministrations. They possils all the good dimber went the fattlements and no set-derican procure aword or thinker without paying them for it. This, and their occu-pancy of so much walkable farming land, has been a disadvantage to the settlers in Rock Creek wellow and simp the mountain Rock Creek walky and along the mountain region, and it will be a decided indvantage to them when the commission appointed to treat for their surplus lands shall have accomplished their surplus lands shall have more beautiful country to be found than Rock Creek walley, near Spukane. The country about Farmington and Moscow, to country about Farmington and Moscow, to further son h towards the Clearwater, on which Devision is situated. This is near the territorial line and mostly in Idaho, the Cour d'Alena reservation being moar Fur-mington and north of it, and is equal to any portion of the Palouse country. The Commendation of the Palouse country. are and ritle in cood backs and buggies, als rille have comfortable houses. are said to be government, where the rich mines are located.

Among Eastern newspapers there was intense rivairy in getting news from Johnstown. But first it was necessary to get to Johnstown, and railway communication was broken. Ropresentatives of Pittsburg papers and reporters for the Associated Press, get in first. The first newspaper mentrum New York to arrive at Johnstown were two representatives of the New York Sun and an artist for Harper's Weekly. They begot in the fourth day after the flood. They first come west as far as Harrisburg, and finding they couldn't get through, returned to New York, went to Buffalo and Cleveland and from Cieveland to Pittaburg, where they hired a special by a long round about vary over the Baltimors & Ohio to Johns-town. The New York Wor'd sent six men they were told the lines towards the West were all disabled. But they made their way to Martinsburg, W. Va, and finally got into Johnstown twenty-four hours behind their rivals of the Sun. The Fittsburg Disnatch had an army of reporters on the ground, and as fast as the men were worn out filled their pinces with others. This work continued with unabated energy for ten days.

A not ancommon instance wherein a manby a woman much younger than himself to distribute his children, is witnessed in the will of the late General Horney, which was admitted to probate in St Louis recently. The general a few years ago at the age of 85, married, greatly to the hidignation of sou and danighter, and the disgust of his friends generally, his housekeeper. Es died not long since, heing over 50 years old, leaving a will cutting his children off, with \$5 each and leaving his widow a fortune of \$90,000. The provocation in such a case is sufficient to exasperate a temper the most serone, and there is not an example on record wherein the children, thus defrauded have not risen for their legal rights in the premises through influenchment of the aged testator's muity, or the honesty of his and ambitious wife. The children of General Horney are no exception to the rule and proceedings to reduce this traditional "old man's darling" to an equitable allowance in his estate will be ristituted at once, on the plea that Le was "unduty influenced" in naking the will that left his large properly

The scenes probable that the position taken by The Oardonran on the Behrlug sea question will be sustained in an unexpected degree before long. Research har been made among documents filed away in Washing--among documents filed away in washing-tion that give the opinions of prominent American statesmen on this question at the time Russia set up acknow to exclusive juris-diction on Behring sen, and trose whose memory goes back to that time awart that a general con lemnation of the Russian assertion was then made. The resuscitation of the debates at that time and other distinguished utterances, if exhumed, may give this administration opportunity to explain the difference between tweedledum and tweedle-deep and abstrace problem that neither logic nor philosophy has yet been able to see through.

A reporter of the San Francisco Alla, de-tailed to attend a banquet given by the Bo-hemian Cinc-of-that city to a sarviving offi-oer of the Vandalia, was refused admittance oer of the Vandalia, was refused admittance for the grave reason that he had reguested to don a swallow-tail for the occasion. It is something new for a man to be required to wear the livery of fashion when he goes anywhere in a business, capacity, and the old original leakins himself would doubtless smile at a point of chaquette so-strained. Workaday people, or, more literally speaking, in this case, work-at-night people, have little time or inclination to cultivate and indule the first foreign that are obvenium. dulge the fluical fancies that are obsequious in their reverence to the follies of fashion.

A citizen of another county, lately decassed, had property at Tillamook; when his satute was appraised the property in Til-lamook county was estimated at \$58,000. A citizen, writing to a local paper there, asks how much taxes this property ever paid there, and a disgusted because it yielded litthere, and is disgusted because it yielded lit-the or no revenue to Tillamook county. He adds that it will never pay takes to the state, representing its true value, so long as the present law remains in effect. Leaving the stery alluded to out of the question, for of course we can know nothing of the facts, this includent fillattrips the misseable fashing.

need of correct laws and their enforcement Phere is abundant room for stell complaint, and the worst of it is the fact that it is well

The Boston Globe demands that there shall be no looking tack by the democracy. This is wise, since a backward glance, ex-This is wise, since it cancer with gain to, tending, say, thirty pours, more for less, is not one to inspire patriotic pride, or enlist, the confidence of the public in this governing powers of that party. Nor is the retrespect of more recent years encouraging or the future of the democracy big with sprain. ise. There is still lest for it, however, the consolation of mouraing the delegated glories of Jeffersonian simplicity and voting for Andrew Jackson, blessed privileges for which, in the general wreck of its political fortunes, the democracy of the nation should be devoutly thankful.

Alexa der Sullivin was arrestel on the testimony produced at the Cronin inquest. If Sullivan was not concerned in the number, there exists at Chieren a most wicked conspracy to criminate an innocent man. It was shown that Cranin feared Bullyan as the enemy who had devised plans for his murder, and further, that Sulivan had exwassed his desire to see Cronin removed. line testimony is definite, as far as it goes, and it goes far enough to put Sullivan under-a very dark cloud of suspicion.

The gloom that for days overhung West-ern Pennsylvania as with a pall has been lightened perceptibly, by the steady presence of full-handed charity. No such record of human suffering in a time of peace iras ev been made on this continent as that which was written in the blood and tears of the defenseless people of the Conemangh valley, and no such exhibition of human kindness and generosity has ever been witnessed as that which has supplemented it.

The Boise Statesman mentions it as a matter of great interest and a good advertise ment for Idaho that the Nes Perces Indian reservation is to be opened to settlement. The Indians are to be allotted lands in severalty. These Indian allotments will con-sume 180,000 acres of the thirty-two town shing forming the entire area of \$ tion, leaving over 500,000 acres of first-class land open for the choice of homes by those who may come in lime.

The wool growers of Pierce county, W. T. or the larger number of them, "pooted' their wool and offered the whole lutint auction at Steilacoom. It was bought for Christy & Wise, of San Prancisco at 20% cents a pound. Pierce county does not p duce as much wool as formerly. The range has been much narrowed by settlement, an the plat of the city of Tacoma covers no in-considerable part of the county.

The Chicago Times kindly furnishes this valuable bit of information:

waltible bit of information:

We are requested to say that Sullivan, the leasemen, is in oway related to Sullivan of the Journal, Sullivan of the Interind, Sullivan of the Tribune, Sullivan of the Intergents, Sullivan of the Revald, Sullivan of the Dolla Naus or John Lawrence Sullivan, of Ro But it remains to be seen whether he is not related to Alexander Sullivan in the taking off of Cronin.

Vigorous efforts are being made to stamp out small vox in Marion county, traces o which still linger in a neighborhood about four miles from Gervais. The afflicted fam-ily is rigidly quarantined, and no about exists concerning it, conditions that in sure the check of the disease within a reasonable

PASSED FROM THE WALKS OF LIPE. Death of Mrs. Martin Conner, an Old Oregon Ploneer.
"E. B. M.," writing from Wren, Bentan county,

"E. B. M.," writing from Wren, Bentan county, souds the following:

The subject of this skelch, Mrs. Martha Countr, was born in Stokes-county, N. C., on the 19th Got Chotoer, 179. Her malden name was war warried to Armetrong Martin, by whom she had nine children, three of whom survive her. In the autumn of ESS she was let'h widow and soon after emigrated with her family to Indiana, and settled near Shelbyville, in Shelby county. In 1863 she was married to James Country, the part of the Country, the she had one soon. In March, 1862, in company with her husband and two younger children, she left her old home and started for Oregon, and during that your mode 1 1 journey across the plains with ax teams, settling in Lian country, near Scio, where she Hved until 1866. The family then moved to Renton Country, there she has since hist ime she has made ber home with her younger son, Hon. M. J. Conner, at whose, restence she died on June 2, 1869, acc 89 years, 7 months and 13 days.

She ambraced the Christian religion carly in life and united with the Mothodist church, and Ilwed a fathing and devoted Christian until death. "Grandma," as she was familiarly called, leaves a Moto of frends in Lian mad Benton counties, as well as elsewhere, who will incours her loss as a well as elsewhere, who will incours her loss as a well as elsewhere, who will incours her loss as a well as elsewhere, who will incours her loss as a well as elsewhere, who will incours her loss as a well as elsewhere, who will incour her loss as a well as elsewhere, who will incour her loss as a well as elsewhere, who will incour her loss as a well as elsewhere, who will incour her loss as a well as elsewhere was a manure of the her insmort." Peace to her sakes and tost to her immort.

# IN THE TENTED GROVE.

Thirty-Sewenth Annual Compuseting of the Christian Church of Oregon at Turner,

Christian Church of Oregon at Turner.

The thirty-seventh annual campaneer up of the Chistian church of Oregon began at 2 P. M; yesterday at that beautiful and commoditions ten-acce grounds near Turner, Rev. J. E. Roberts, president of the association in the chaft.

"I love thy kingdom Lord, etc." was the opening hymn. Alter prayer Rev. A. E. Wade, state even-golist made the opening address.

The large grounds are deficed over with tents and cottages. In the center of the camp is a large taberancie coster, will liently lighted with hanging lamps, while the thory and states are opening the states of the control of the stand, a magnificant with the control of the control of

ground and have their tents pitched, tables are ted and stores piaced.

The invisio is unifier the leadership of P. O. Me. Cauley, ably assisted by Miss May illusterwood. Miss Ivey Mascher and the whole antiques the invision of the comment of the delegates and attendants were noticed Rev. W. D. Humpbreg, of Albany, edition of the chrypes, breacher, the utrain of the Christian church in the state; Rev. A. B. Wade, state evangeliet; Rev. B. E. Slonfors, R. A. John Holmster, Sallyni, Dr. B. M. Boty, Emity, Hev. T. B. Holler, and the state of the christian church of the assignment of the nearly sallyni, Professor Genio Kranety, Ochland, Cal.; Rev. L. S. Balley, Stayton, Under Fred Missiner, Silverton, The meeting will continue three weeks and the first are discovered by the control of the christian of Pennsylvania, who is to be the chief speaker is expected operative to-day.

### THEY CHANGED THEIR MINDS.

Mambers of the Board of Filet Commissioners Concluded They Would Issue Branches.

The heard of pilot commissioners, who refused to issue herocales to plots of the O. R. & S. Co. a few days since, have evidently changed their minds, or one of them at least has. A called orin, at which all three committed, at which all three committed by secretary, were present.

communication be ret d:

Astronia, Or., June 13, 1889.

A. Mentgomery, Esq., Fresident Board Pilot-Commissioners—Darr Mr:—We, the undersigned, member of the board of pilot commissioners for the fract of the board of pilot commissioners for the fract of Organ, and constituting a majority of said board, hereby demand that you call a special meeting of the benefit to be held at our require office between the hours of 1 and 5 ft. M. Thursday, January 18, 1869, for the consisteration of 1, M. HEGWN.

President Montgomery called Contein J. A.

President Montgomery called Captain J. A. Brown as the chair. President Montgomery now asked to be excused from further attendance at this meeting, and upon motion his request was granted, J. A.: Brown acting as president pro turn of this meeting. Upon motion the following-telegram was read To E. A. Noyer: See Whom and other pilot sommissioners, and demand that they hold meet at the pilot sommissioners, and demand that they hold meetings at once and issue branches to four river pilots, Hrank Brown, Patterson, Enkin and Kindred. We must have this done immediately in order to succept the requirements of the business. C. J. SMITH.

in order to seek the requirements of the hustness.

C. J. SMITH.

The application of W. H. Patterson is a branch license on Columbia and Williamette Syres was read, and upon motion duly made and seconded, the secrotary was ordered to issue a branch to W. H. Patterson upon his filing the required bond.

The application of H. Emsin for a branch to W. H. Patterson upon his filing the required bond.

The application of H. Emsin for a branch to W. Emsin upon motion, duly made and seconded, the securitary was ordered to fiscue a branch to H. Emsin upon his filing the required bond. Upon motion like secretary was instructed to indorse upon the branches of Patterson and Histaria the followfuls: The especially agreed and indorseroed between William Patterson and H. Emkin the followfuls: The especially agreed and indorseroed between William Patterson and H. Emkin the followfuls: Emsine we am its heart of Oregon, that the incurse be and is becrypt issued to the gaid Patterson and Emsin will return tach planches to said heart of pilot commissioners to take a storn upon same as flexy mills return tach planches to said heart of pilot opannissioners to take a storn upon same as flexy mills return tach planches to said heart of pilot opannissioners to take a storn upon same as flexy mills return tach planches to

### OREGIN BYATE NORMAL ECHOOL.

On Wednesday, Jung 19, the class reassembled at 16 A. M. to complete the work which had been commenced on Theoday-afternoon. The addresses were all good. After assolids, given by W. T. Reynolds, of Polkresninty, was sawarded to Laroy cawls, of Yembil country, for the best defired as. The presentation of the diplomas was made by Rev. D. T. Stanley. The presentation of the diplomas was made by Rev. D. T. Stanley.
At 4 P. M. the Alumbi Association met again in business ression to complete the work of organization. The membershap of this association now mimbers illusty.
At 3 P. M. the therapy programme of the Alumni was presented to a large and autoutive audience which consisted of well prepared addresses and essays, supplemented by excellent missie. After the hiterary excellent missie. After the hiterary excellent by excellent missie. After the hiterary excellent by excellent missie. After the hiterary excellent by the propagation of the North Stanley excellent by the propagation of the North Stanley excellent by the stanley of the North Stanley excellent by the North guests, toyalred to the residence of J. B. V. Buller, where a pleasant hour was spent in reviewing happy school days and the discussion of a colla-tion prepared for the accusion by the resident members of the association.

hether it be on the street of a crowded city or in paince of the rich?
Labor is the sweet solace of our daily walks, he sweetest fruit of labor is the happiness expended in well doing to others."
In closing her essay, she spoke of the fruit of the resumptified to them in their graduation, or essay was characterized by a boanty of excession that bordered on poors.
Miss Mary M. O'Reill chose forther theme, "The field of a Perfect Woman." "The beauties of marketer of a good and soble woman," said she will not hough not looked for. The greater and ofter eclipse those around them as the Venus de life graaped the palms from the Venus de ledict."

ection. invil Chorus," a selection from "Il Troys-r the first vocal class, was sung with a

PRESENTATION OF DIFJONAS.

The diplomas were presented to the graduates by Rov. Father Rauw, the chaplain of the neudamy. One by othe the young ladies were called up sigh thended their sheepskin. A flor receiving the diplomas they were presented with gold medals and crowned with while wreaths. A green lauvel wreath, emblematic of their achievements, was placed on their arms.

The alumnit prize medal was given to Miss Rott.

SHE RODE IN MANY RACES. Miss Myrtic Peck Talls a Reporter Something About Banning Races and Past Time-Fo-

male Riders Marry Their Managers. "Well, how do you like riding?" asked a re-porter of Miss Myttle Peek, the during young equestrienne, who gave an exhibition of her skill at the City Y ew Park, several days ago.

Like it?" oplied she "there is nothing I like better, for I feel as much at home in the saddle as I do on the ground."

Being asked to give a brief sketch of her riding

leeing asked to give a brief sketch of her riding sarcer, she said:

"My fact riding was done at my home in blichigen. I was mined on a farm, and I still remember he was still remember in the said to brief a to make a farm and it will remember he had to be stold to be a farm. I had not still remember he had to be said to be a farm and to the most of the most dealer without hatter or bride than of the most dealer without hatter or bride than of the most dealer mad yell trained home. I must have been dealer mad yell, when my sierer, two other girband my entire made our debut in a small country fair. The hiese says were held in many of the small towns, and the event was never complete with the conventional scrub races.

"My first professional race was made in 1822 to Rockford. Ill I was then then 13 years old and weighed a little over shifty bounds. I was pitted against Larie Finnes, the Colored chamles, in a five mile race, and, though I hardy expected at the many of the story and the story with the size of the size.

it, came out victorious. I seems with 18.88 specified in a twenty mile contest with 18.18 specified out, at Rochester, N. Y. L. Riso, won that 18.00, making the contrast in 43:22 and beating my pourpetilor by x:38. In the fall of the same year I rode against 265, 267 Second St., - Portland, Or.

Cricket Still at Beloft. Kan. This was syain a twenty mile rue. I best my first record as well was a syain with the rue. I best my first record as well as the syain wile in the syain was a sun mile race with the same indy, soon after, I came out ahead the length of a streets.

"In the fall of 1883, I rode a nye-mile race with this Tenyason, in Cathrilli N. Y. She quit the track siter going two miles. I kept on and finished in F. 33, the assets flye-mile time on record. "Stace them I have ridden in nearly every state of the Union. My fastet one mile was made in I: 44, the lastest dye miles in 9:38 and my best feel in 26:012. The quickest chapte from one horse to another I made, in a closely contested race, in 14 seconds." Kelly and Bessio M. Guinoun. The Assembly hall of St. Mary's academy was gentendary efternoon profusely decorated with twigs of try, wild flowers and choice roses, the occasion being the commencement exercises of itio gradualing class. The class of '80, numbering five young indice, had finished its labors, and was prepared to be unbred into the active, practical world. They had completed their course of instruction, and the last act of academy life was about to be onneted—they were to receive their diplomas bid adden to friends and schoolnates, return thanks to precepture and instructors, and sever their connection with their alms mater. The exercises usual on such occasious, though perraded with a delicate touch of pathos, are at heavy a happy, and they were doubly so at the pecially in this warm, we would be porter.

"Yes, it is a little tiresome," she replied, with a good-nathred laugh, "still, it is my favorite way seemented to ride standing but the other

bone. It is a nard matter to get anyone to ruse that way, one area course."

"What has become of most of the other lady riders, who attained notoricky aome is to or seven years ago, when female copuestion has was more ablest that we have the state of the old-time girls." she said, "crellost—the matrimony. Not a few of them give exhibitions a few years and then marry their manager,"

Miss Peak is rather is pedite woman with an open and frank expression and pleasing features. He entire beforing impresses one with the daring and frank expression and pleasing features. Here bearing impresses one with the daring and mitable pluck which she is known to pos-

CONGREGATIONALISTS IN COUNCIL The Forty-first Annual Association Will Convence

With The Dalles Church, Thursday, June 27. The ministers connected with the Congrega-formal church of Origon will convene at The sulles, Jine 27, and remain in session several lays. The following is the programme of the

Thursday, June 27.

2: 00—Organization.
2: 80—Devotion, led by molerator.
2: 40—Discussion: "Should Organization. 2:40—Discovers
Evangelist" Opened with a paper by key. E. .
Roberts.

Sanday. June 30, 1880.

MORNING SESSION.

11: 00—Communion service, sermon by Roy, G.
C. Hall. AFTERNOON SESSION. 3:00-Children's service, in charge of G. A. Rockwood, state superintendent of Sunday 3:45—"The Christian Endcavor Work," by Dr. C. R. Templeton.

EVENING SESSION.

8:00-Eosolutions in memorism of Rev. G. H. Akkinson, D. D., by Rev. O. W. Lucas.

8:30-Address by superintendent, C. F. Clapp. Delegates were elected by the First church of this city Wednesday twoning as follows: Mrs. L. M. Foster, Mr. and Mrs. C. L. Fay, Dr. C. R. Tem-pleton, George H. Himes, G. Skindler, A. S. Frank, 10 C. Brank, Mrs. C. L. Fay, Dr. C. R. Tem-K. C. Brundage.

This meeting will doubtless be one of unusual Interest, on account of the large number of new ministers being added to the working force of the branch of general church work, who will meet with each other and with the lay representatives of the several churches for the first time. The Dailes church extrestly requests that full delegations may be sent from all churches.

THE EVEN SCALES OF JUSTICE.

A Bailway Company Sued-Conviction of Joseph Poster-Minor Court Itams. J. Wilson commenced suit in Justice Phelan's court yesterday against the Portland & Williamette Velley Rullyay Company, to recover wages for work performed the inter-part of 1887. The complain, alleges that \$24 50 with interest at 8 per cent, is due since September, 1887, \$24 50 from November, 1856 from December, and \$63 25 from

November, \$35 from December, and \$68.25 from January I of the next year, making in all \$170.73, the amount sued for. the amount sued for.

MINOR COURT NOTES.

Leanuer Holmes sued Andrew Pipher in the state obriguit court yesterday to recover \$895.

A marriage Heenes was granted yesterday for Eugens Periot and Eliza Hurlaux.

JOSEPH FOSTER CONVICTED.

ABOUT DOMESTICATING PREASANTS. A Correspondent Thinks It Can Be Done by Learning the Premiur Call of the Mother Bied.

HILLEBOI To the Edition of The Obscottant:

I motion in your columns a few days ago
i motion in Mr. Garrison's failure

And the Column of the Column of

[Mr. Bayyor has evidently not seen the paragraph in The Organization operating the two broads of young Mangolian pheasants raised by F. Henshaw in this city. Mr. Henshaw attributes his success to his style of feeding the young birds, or, more properly, to the food used. He has never bothered with learning the call of of the hen pheasant, as the hens seemed to get along with the young birds well enough.]

Fully Determined Washington Post.

A story is being told of a very close citizen
of Washington that wanted to go to Lynchbutg recently. At the ticket office he was
told that the fare was \$1.80.

"One cighty," he muttered. "Gif-you
\$1.40."

"One" out fares, sir. One cighty is the

"Can't out fares, str. One eight is the fare."
"Gif you now fifty."
"None. Quasignty."
"But il livatic."
"That is your privilege," answered the tocket seller. So he marked off down the track and had made about half the distance when he legist an engine tooking and whist lime begind ham.
"You needn't, vissile," said he, waving his "I'll not gome back."

The globe are but a handful to the tribus. That almuber in its bosons.

The funeral of the late Mayor E. C. Wheeler took place from the residence of Mr. J. T. Stewart, on Fourth and A streets, yesterday forengen, and the remains were triken to Lone Fir consetery for interment.
At the house impressive religious services were conducted by Rev. D. O. Ghormley, pastor of the Presbyterian church.

Beautiful floral decorations had been

placed on the sispant casket by loving hanos.
On the strepts in front, and flanking the
house on the north, long lines of carriages stood in quiet waiting, while on the grounds were gathered the friends, associates and veighbors of the late maps, who had come to pay their last tribute of respect to the capitled. The services at the house having heal ground all. ech concluded, the caskst was borne to the funeral car in waiting. Then came the be-rested wife and relatives, who took seats in

the ministral officers of East Portland and Albins, in directors of the Frankin Build-ing and Lean Association of Portland, and many of the county officers. After these the many of the county officers. After these the carriages containing officers formed in the procession.

Members of the East Parlland fire department, of which Mr. Wheeler had been an officient member; in their bright uniforms, marched slightly in advance of the funeral car on the sidewalk.

car on the sidewalk.

Then came the secret orders of which the

Then came the secret orders of which the decrased had been a member. The fraternal orders were is follows: Washington lodge No. 46, A. F. & A. M. East Portland; Phalanx lodge No. 14, Knights of Pythias; Orient lodge No. 17, W. O. O. F., and Unity lodge No. 25, A. O. U. W. Partland.

1t as estim sted that there were fully revently carriages in the procession. The route was along Fourth effect of J. on I to Sixteenth, then to take the final ceremonies were conducted by the Masonic Iraternity, S. Bullock, W. M., officiating, which was solemn and impressive.

In thy place to stand.

PPPECT OF THE RUMAN BREATH. It has been told by a merchant, long resident in Mexico, in a book published in 1849, that is a common practice in that country to tame the most violent horses by a very simple but singular method, viz: by putting to tame the most violent horses by a very simple but singular method, viz: by putting the horse's nostrile under a man's arm-pit. Our informant assures us that the most refractory brute instantly becomes traciable on inhaling the odor of the human body. This strange statement is corroborated by a fact first made known by Mr. Callin, who tells as that when an Indian of the Rocky mountains runs down and nooses a wild horse, one of his first sispirs to place his hand over the eyes of the struggling animal and breather hid it is a straight gammal and breather hid it is notwist, when it becomes decile, and is so completely conquered that it submits quiedly ever afterward. This information naturally led to a good many experiments. A. Mr. Ellis, a gentleman of Cambridge, happened to place Mr. Callin's statement, and felt a natural clearly to acceptain how far fifts mode of horse taming might be semployed among British forms. He tried the experiment on a filly not a year old, that had been removed from her dam three months before, and since that sime had not been out of the stable; he tried it, too; under manifest disadvastage, for the filly, which was quite wild, was in the open air, with several strangera about her, and holt the owner and the number of the part of the part of the months of the form the claims. about her, and note the owner and are much tour were rather sasking amusement from the failure, rather than knowledge from the, success of their experiment. It was with great difficulty Mr. Eills managed to cover the eyes of the reative and frightened and the world. He approxided and blew into the eyes of the restive and frightened animal. At eacht he succeeded and blev into her nostrils. No particular silect seemed to follow. He then breathed into her nostrils, and the moment he did so the filly at once desisted from her violent struggles, stood still and trembled. From that time she became, very tractable. Another gentleman also breathed into her nostrils, and she evidently enjoyed it, and kept putting her nose to receive the broath. On the following thorning she was led out again. She was perfectly irectable, and it seemed to be almost impossible to frighten her.

HOW TO SPOTE A COW.

The following very sensible acticle is from the durination Times. Nevertheless it is worthly of a careful reading by every man who miles a cow whether he be owner or

worthy of a constill reading by eyery man who miles a cow whether he be owner or hired-hand;
The received drawback in dairy work is the difficulty in obtaining honest, faithful servants. Bo far as preundary matters are concerned thore is generally no complaint to make; but there is smother fluid or honesty, which is vory exacto. The melionity of milk-meniare acities strict nor particular in the performance of their work when the master apmot leave the acities strict nor particular in the performance of their work when the master of the twenty in the master of the twenty of the master of the twenty of the master of the twenty of the master of the cows: with gentleness, and to milk them quickly but without fluory, and at the same time to do the work theoroughty. Very key, if any, people can find pleasure in mi kinga number of cows morning and even in for month after menth, but yet it must be done with the most perfect regularity and thought the most milk has been produced than its required, will abstent from producing so much milk and devote the face to the fact the production of fat or of muscle. Almost anybody can mix a cow, but there are few who can do the property. It is an art, and the man who can practice it is worth more to the duryman than any other help. The art of sulling is to draw it of streadily, quickly by no means hursiedly), and completely. Ecarcely sup two covers are factly in disposition and in the character of mature of their tests and under. Bome are hard to sall, and have very small apertures; some have can be consulted and the required some hard to sall, and have very small apertures; some have endorted as; some are quite easy to mile our of mature of their tests and under. Bome are hard to sall, and have very small apertures; some have endorted as; some are quite easy to mile our of mature of their tests and under. Bome are hard to sall, and have very small apertures; some have consulted and the various cows, and try to humor their can are hard to sum the disposition and in the character of

animals know him and his temper and moods far better than he knows theirs. They must be humored and put into a good humor. They may be, forced, into submission, buf they capt. Instead of the care of persuaded into willing compitance. If they we roughly handled approached hastiy, and without any care for their "mood," It irritates and worres them, the fretting, two agitation and the woney, make them tall in quantity, and within a very short, imag the decrease in yield is quite marked. The worst of firs that a return to proper teatment will not restore the former condition of things when the amply has followed the mentous of things when the amply has followed the monotone of things when the amply has followed the cows to the care of oven the most careful person. Under proper feeding and kindly treitment the under lot the cow becomes dimendal with milk at regular intervals, and when the time contest the looks for much to be relieved of her hurden. If the unilamen understands the cow she looks for much to be refrend, and yields up her milk with pleasure because the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is patriful to accuse the distension of the udde is not then perfectly irraited and the cause will renerally be found outside the cow she had not the cow is milked and they are even capable for jeal only it is not a large dairy, where perhaps hilly or its cows in milking and in perfect gentleness and kindac

When a good judge of horses makes a trip through almost any section of the country, and looks at the horses on the farms of that section, he can see that comparatively few farmers have studied the subject of rearing horses sufficiently to enable them to understand what course they sheald take in hereding them to insues the best results. A man makes up his mund whether he with breed heavy or hight horses, and thaving decided as to that, the expense is, in many cases, the make consideration. Bed does not a ppen to understand that the services of a superior horse are worth more than these of one that has neither good breeding nor individual morat to recommend him. The difference in the fewscharged may be only a grandight education to made without regard to whether the horse is suited to the maces, and because 25 feative where they are also deficient, the choice may be the worse that could be made. The owner does not realize this, however, and perhaps is much surprised when the colors do not represent to what he expected. If he had afterned himself by reading, or had consulted some skillful becales of horses, he would have known that care that is as lobated that he can be played the had afterned himself by reading, or had consulted some skillful becales that he say he had not realize the horse he has effected some skillful becales that he can be patronized with the load have known that are that is as lobated that he can be patronized the main consideration and chooses the harresthat has effected some, saving, while the fact may be that the would have known that are required to grow the foot to a chiralic age is larger with the load he good the head of the property of the horses were the horse than her player of the higher class of horses it in a real troub continued to a draft horse in increased by good, prompt, action and a soundness are the most important class of horses in increased by

Stock Journal HOW PATENTS MULTIPLY.

HOW PATENTS MULTIPLY.

The Patent Office Gazette for March 19, 1889, contained patent No. 409,000, and a handsome start has since been made on the 18th hundred thousand. The issues are piling up at the rate of nearly 2000 s month. The rate of accumulation is a constantly accelerating one. That the issuing of the first 104,000 patents covered the whole period of eighty years from 1798 to 1870, while the fourth hundred thousand were issued between June, 1884, and March, 1893, a period of less than five years. Evon at the present rate of increase, the close of the century will see between 600,000 and 709,000 patents on record in the United States, and judging from the past the number is likely to severy obnsiderably in excess of these figures.

The degree of mentel and physical activity which these is at listed to never your stant change and improvement increasy thing periodising to impant life which this impless energy of invention brings about, are subjects for reflective consideration. Taken in connection with the repid-growth of the country is population, the organisting of new states with scores of new fowns which in their first decade become enters and in their account taken rank as great ministral and commercial confern, the question becomes an interesting one, what will the little child of to-day be privileged to see, should be be spured to a rise all age? Many such among us will live to read the bustery of the first will be as a tale that is told; to us it is sealed book, fulled naknown wonders faintly indicated by the lachievements of our own time. Mechanical News.

QUESTIONS AND ANSWERS

A "subscriber" is informed that grape wine can be made in a cider press but it is considered recessary not to crush the seeds.

considered eccessiny not to crush the seeds, so in wins countries they put the grapes in a great vist and people itsed the graps and so crush them. Other methods are coming into as of interpetation. The process of ouring prones, ctn., has been explained recently, as the subscriber should know if he reads Tax Orsaontas. There has been great deal of apple joly made for the market at the East Portand can sery. They used the cores and peclings for that purpose, after causing the fiesh of the apple.

for that purpose, after causing the near of the apple.

A person who knows how to make jelly dural, need to be told how to make it of appled as it is a simple process and common to all fruits. There is a very large factory at Salem for making sineger and ofter, edites, etc., and there are tens of thousands of bandles of spine going to waste every year. Much, of the product year to desironize.

THE COUR D'ALENE CAMPS.

Advent of the O. R. & M. to the Mines Brings New Life.

Bavolopment That Hee Been Made in Various Chains - An Interesting Sommary of ... Present Pressecta.

Wallics, Idaho, June 12.—The present season promises to be a light one in reany sections of this comp. The low price of lead and the excessive tariff charged by the Northern Pacific Bailroad Company has a very disco traging effect on other portions, but the advent of the C. R. & N. in the mines adds new life, hope and energy to the claim owners generally. At Wardner, times are very dull pumpared with last summer. This is only temporarily and when the change comes its mines will large a read greater than ever

change comes its mines will forge a cent greator than ever.

Osborne and Moon galch are developing there immense treasures and Walage is still dormant, partially from the effects of the late jumping of the townsite and surfailly from the low price of lead.

At Mutan times are good, the mines are all turning out well, new improvements are being made, new concentrators are being pushed to completion; large trainways are being effected, and the stores, hotel and bouses generally ore all occapied and coing well. The Hunter Mining Company is doing extensive development, while the Morning has yeard of one workings should. The Grouse Evening and others are doing their shares of self production, while the Central and Little Ginet are filling their ore dumps with a good class of the ore.

is inevitably marked by a failing off in the vicid and aconsequent diminuition of profits. In a large dairy, where perhaps hitly or 155 cows are imposed to a foreman of the milkers whose soil duty it should be to see that the cows are imposely treated and carefully milked. He would test each oow and also keep a periect yield of each at overy militing. The scales alone should test in him whether the milkenen were doing their duty fathfully.

SELLL AND JUDGEEST IN BREEDING
When a good judge of horses makes a trip through almost any section of the country, and looks at the horses on the farms of that sention, he can see that comparatively (ew farmers bave studied the subject of rearing horses by a sudded the subject of rearing horses and feignity to complete them to under-

able claims on the creek—a splondid vein of high-grade are that only needs a good season's work.

At the Diamond Hitch, near Burke, a small ferce of men are working, but the smallness of the force fully covers the old mining adage, "Small force role or." This ore is diadoutically the richest in the Cour d'Aleite, a rich chloride of eliver, assaying from 130 cureex to 700 and 800. It is one of the rich "stand bys" of the camp.

The Poorman and Poprisan extension are doing the neual unequit, of work, and it is whispered about that soon the Poorman will declare its first dividend! Walcome news, of course, to the stockholders.

The Tiger, the leader of all, still holds forth, conting out its good ore and making no noise, whatever; run on by siness principles, and managed in a business basis, there, a only que conglusion to arr ve at and that is: It must pay handsomely.

Over in Nine Elletthe grantie is still champion, plenty of one in hight, plenty of noney in hand for the digging.

The Panhandia has done itself proud striking a large body of coincentrating ore, while the Custer has ore of the richest character and plenty of its roun on the wonders are unen who understand what they are about and mean to make it a success.

Un near the head of and close to the sum-

they are about and mean to make it a suc-cess.

Un near the head of and close to the sum-mit, there is some fine heaver side you cass the bobson mine, that is simply a mass of ga-lend. As you pass along the road there is a lovely view of the whole country. To the shorth and west the mountains of Murray appear, while away to the south and cast are the Bunkar Hill and St. Joe peaks. Di-pectly cast, lowering above them all, its peak capped with the snown of winter, rises Bun-sel - and grand and magnificent in its pro-port ones.

File some tall cliff that lifts its awful form, freedle, from the valc and naidway leaves the storms.

Storms to the storms the rolling clouds see thread.

Eternal summino settles on its head.

Eternal sunshino extites on its head.

As you approach nearer, and nearer, the beauty of the merks beauty of the one is married by the merks of se fish man. Trails, tunnels, shalls and outs are to be seen on all sides.

Going along the trail from Carbon Center you puss by the famous Virginia, dimnous for, it immensity and volume of ore, a ledge of galena encased between walls of slate and quartitie, the whole damps a mass of shining metal. A tunnel has been driven severity tyo feet and the ore body increasing every toot.

eral fine-tooking isdees—with large dumps of ore, mostly the property of prospectors who are hard pushed for capital to develop them. Nam: the tony ou find the Wild googe, a new producer end-a rich one too, a fine yein about three-feet, who of chloride and gray copper assaying very well. Along down the trail you pass the Paryott, Colyn, Stiting Bull and others, an the dumps of which you notice large pilms of good ore that only needs facilities to get it to market. Further morth you take a new trail just; blused to, the Excelsion, Grand Courrained; Proshontas, the new finds recently made by Mesars. Woods, Price, Kuhu and Keegsa. The vein is a true fissure, and crops long viors the claims in different places. On the Excelsion the showing is a big one; fully ten feel of ore is exposed, and endy the foot wolf found, as yet. There is about twenty-fixe tens of carbonate and galena ore on the dump, and is an excellent showing for the nontas is being divise on ore.

Farther north about 2000 feet lays the Hidden Transure, another, secens find. For a diplance of 900 feet his owners find. For a diplance of 900 feet his owners find. For a diplance of 900 feet his owners find. For a diplance of 900 feet his owners find. For a diplance of 900 feet his owners find. For a diplance of 900 feet his owners find. For a diplance of 900 feet his owners find. For a diplance of 900 feet his owners find. For a diplance of 900 feet his owners find. For a diplance of 900 feet his owners find. For a diplance of 900 feet his owners find, for in one of the find of producers will be added, to the list of mises is slid tille, the journers preferring to make it is layed, and others. All this, tenup needs is a rail-road to make it the largest ore-produced his year the volume of ore intal will now from the Suese country will spent for the lab of the former of the sum of the promises of the sum of the producers will be added.

PARMHES IN THE LOWER HOUSE OF Colonel William Henry Hatch, of Hanni-

Colonel Withins Henry Hatch, of Hanni-bat, Mo., who has just completed his fifth term in congress, and his third term as charman of the house committee on sgri-culture, is everywhere recognized as the chairman of the investment recognised as the foremost moder of agricultural deplation in the house of representatives. The rise of this agricultural committee to a position of preminence in the bouse is nearly consentent with Colonel Hatch's connection with its When he became one of its members it did not even have a committee room for likely but shared half its present quarters with another, committee, for definite effects in behalf of agriculture were made, and so, the body drifted into legislation rather than propaged for it. Since the opening of the forty-single control for the consent of the latter of the control of the con

Newspaper AACHIVE®

The People Are Live and Energetic Here Is Still an Abundance of Gaverament Land for Reportedure and Pre-suptors.

Davingor, June M.—It has been sut a few years, since the United States govern-ment transported all of its army supplies in Weshington territory with four and six-Washington territory with four and six-mole feams. So frequent wave these, trips from one post to another, that the trail they followed became the established roadway for all travelers in those days. The great, heavy army wagons would wear rute through the prairie sod, and the rains would wash these out sach season, compelling the army trains to follow a new track along the aid one; and these in turn would also be washed out thus continuing this plan annuwashed out, thus continuing this plan annually until a well-defined and clearly marked trail would be made. To this day these government trails are referred to. Even some of the new settlers describe their homeng at such a point alongside the

ed from Walls Valle to Fost Spomost forty using from Spoking Pala. These springs were site but known point forg the routs. A volume of water as large ground as the hub of a wagon and as cold as miliniously powred out from Cotton-Brings greating quits a little stream sek, along which forest a had grown, and that caused the army caravans and immi-grant trains to camp here. To this day those springs are the camping ground of

is imigrants.

This description is given to fasten upon the minds of the readits and of "old timers" the location of the new and most us town of Davenport in the Big prosperous cown Bend coverty. Cettonwood Springs is an undestrable mame for a town. A Mr. Davenport owned

a part of this townsite, and the settlement a law years ago adopted his name as the name. Or their new town. One thing most certain is that the man after whom this town is named will some day be proud of his name-

It's committee of intelligent men had been sent out through the Big Bend country, being 175 miles long in 100 miles wide to select a central and commitmed in the first for a good town, they could not have helped locating it just where Davenport now is.

oss it is in the geographical center of of rolling prairie, and the land is as now land is any part of these United Besides, the location of this town of Issue. Besides, the location of the town of favon portion and the gravitating point of favon portion and the section of estates. It would seem a state of the section of estates. It would seem as the sould for water to run down hill. These plessiding public stone, would be a provailing noestive but besides it looks just as it may not the section in a circular valley of level, but not ow, lands. The indulating country surousding it rises from the valley by an easy nd since the public descent. On one ide of the valley the low, hills rise more about the walley or a barrier to probe the own hills rise more about the walley or a barrier to probe the own a barrier to probe the greated for a barrier to

ver these rolling prairies.
The sorrounding country is one continuous succession of rounded knolls, the sides if which recede in graceful curves, each rolling wave sweeping into its predecessor.
It is is a preity country, and if in as high a tate of cultivation, having what cottages, arm houses and the improvement to farms

we twenty plows breaking sod where one is now employed here. So yery great has been the rush of immigration to this Big Bendcountry that there is not a single breaking plow for sale in this country, neither can they be bought every one they could hear of. Nothing short of the trize that first filled Kausas with immigrants, could compare to the period for the country in the past welve mouths. Prior is the advented to two rails ways, the Northing Pacific and the Seattle, Lake Shere & Mastar, both sarriving about Phermany Inst, the long line of white-overed wagons, that countantly pourse, into this country is the first welve was the country and the Seattle.

Indiana were the "scare crow."

And well they may come, for there is no sher part of these broad United States where man can go med take up under government land laws farm of 100 acros of as good land as this. Besides, here is a country where a climate exists that only a chronic rowler could find, fault with. It has its sgular tour seasons, which pass from one to the other without violent changes. The winter is here it is not cold, not rainy, or are the roads more as a selection. When winter is here it is not cold, not rainy, nor are the roads inuddy nor solidly frozent it is a climate where the peach, the apricot, the mulberry; the chestnut, walnut, butternut, apple, pear and plum trees are growing, with the peach trees old enough to bear and producing inscious peaches, and the fruit and forest trees are in a healthy state, some of them six and seven years old. The current, raspberry, blackberry, strawberry and all small fruits have been and are being stown.

rant, raspberry, blackberry, strawherry and all small fruits have been and are being grown.

This is no "boom" yarn, no rallway folder statement, no real estate blow, but they are facts—solid truth that sam be proven any hour, day, week, month or year in the past six years, since the first settler got started, or it can be shown at any time in the future. The writer has been in these orchards—has seen the truit growing, and seen the live, healthy tress that could not have grown to their present size except through years of growing. He was in one orchard—that of a first however, about six unless from Davenport, where the orchard was seven year old, sixtiffer statement is voluntarily made that its locality of chard, was seven year old, sixtiffer statement is voluntarily made that he locality of the content of the produce a more shrifty or better orchard the Morth, South, East or West can produce a more shrifty or better orchard that has been here long enough is growing or alarting an orchard. They grow and grow best possibly, on the highest points, and they grow on the lover lands. Just put the seed or trees in the soil, then leave them alone, and as sure as sun spines, just that sare will they grow.

LINCOLN COUNTY.

# LINCOLN COUNTY:

ALMOST AS LARGE AS THE STATE OF RHODE ISLAND OF DELAWARE.

If a single county in Delaware or Rhode

Island should be enlarged to the dimensions Jaman should be enlarged to the dimensions of Lincoln county, which is 54 miles long and 42 miles wide, then the bulance of either of these states would not afford room enough on which to hold a world's exposition. There is at this early day an industrious striving population of 10,000 people in the county, of which from 700 to 200 are residents of Davagnort. county, of which from 700 to 200 are residents of Daverport.
No better idea of this active and go-shead

No better idea of this active and go-ahead place and he given than in the building pecord. In the first place, the inhabitants are an active, pushing people. Out of the whole number, it some snail, while in search of food, and moved to increased speed, should run, over, about three men in the town; then fire entire balance of the population would duplicate the grit, push and building record in a provide form of Tacoma, Seattle, or Spokane Falls. These three are the only inactive men in the place, and the only ones who will not shed their coats and their pocketbooks to push Davenport. These three are not in a position to any any may; nor see they in the read to progress, but they belong to an anteddiuvian race, and do

not belong to Danrinport. They are distinct that all new homessekers may know what an active population is here.

To est emplify, one evening a few business men pathered together and in an informal way through that the fown needed an organization, so all parties seeking information could find authorized parties to conier with. A meeting was agreed on next evening, and at that reeting the outre male population, those having the good of Darenport at heart, were present. In less than an hour a Board of Trade was organized, salely that Davenport might be in a position to meet any and all departed, The harmony of that wise, that note to it. The harmony of that

it will soon be seen in various places it Portlano. It simply is an available market quarry which ere long will enable. Daven

mineral: found in the "Rockies" are here in superabundance.

In fact, all the resources but salt water that the Puget sound towns have this town of Davenport has; but best of all are its millions of seres of rich land. The top soil is a volcanic and alluvial soil and as fine as flour, the sub-soil being a marl or clay. The moisture is thus "puddled," and from the snow or spring rains crops grow. Tree claims are seen everywhere, on the high and low lands proving that vegetation is superior in growth.

As to the yield of grain it is best shown in the complaint of a farmer who said that the claim that crops had never fulled was untrue. That out of six crops he did have a failure for, said he, "I got but twenty bush-

amount is a good crop?"
"A good crop," said he, "why I have harvested forty-four bushels per acre and never once but this year of failure have I taken less than thirty-five bushels."
The crops run actually from 30 to 45 bushels in wheat, 65 to 100 in eats, and 40 to 60 bushels."

commence life anew, it should suggest the value of this land. Hundreds have done this and will continue. But they must get here soon, as lands are decreasing daily.

# GROWTH OF DAVENPORT.

HAPID ADVANCEMENT TOWARD THE FUTURE CITY—IT HAS NO BIVALS.

We commenced to tell of the growth of this continuity in a prior part of this article, but drifted into the resources. We are like the man who has found a bonauz. Our eagerness to tell of it, and get others interested, leads us into a rambling way of telling it. In fact, the future promise of a town can not be told in print to convey to the reader the real merits. But here is a field for any man, and it is open to the honest, hard-work-ing day laborer, to the mechanic and his helper, to the professional man and to the

banker and merchant.

This propie are energetic to the core, and their hours are so taken that they have no time for neasense or folly. This year will see the completion of four new charenes, two new hotels, one a credit to any town, a

see the completion of fame new clearches, two new hotels, one a credit to anyltown, a new bank block all of brick and stone, a new and vary large storeroom; and electric light and water works.

No bills ever looked prettler than the bran new five-dollar bills of the Big Bend National tank, of Davenport, Washington: Just get one of those bills, look at it, and let your mind run into reverie. Think of the short time ago, when the Big Bend country was an unknown quantity, as much so, almost as Central Africa, and then think what three or; four years have done. From an under cupied praine country, given up to the reverberating choes of the howing coyole, or the nuths of roaming Indians, now the railway track has absorbed the Indian trail, the locumotive whistle the coyote's yelp; now depots and elevators, stoam elevators which, although, but recently completed, handled over 100,000 bushels of unsold wheat. Now the live newspaper outlishes the events of the world which the cowboy fomerly peddled to stragging camps. Now farmers are breaking up the sod on great farms over which restless herds of stock grozed at will but a few moons ago.

Here, where only a short time ago, there was only the great spring to attract the wandering roamers of the country, there are four hotels, all constantly crowded, with as many lodging houses, and besides, you can get a square meal: a clean bed, and live as the chosen elect do.

There is a newspaper, and a good one, edited by Mr. Frank Dailam, who is one of the leval-headed delegates to the constitutional convention at Dlympla. There are eight general dealers, and room for eight more. Three agricultural depots, one of which heads one morning recently \$500 worth of machinery, spot cash, to new conserve en route to their government claim. It

of Response the noise train double the portification is about a second of the portification o

NEW TRANSCONTINENTAL BLEEPERS. Description of New Cars Used on the North-ern Facific.

Br. Paul Pleaser Press, June 7. The Northern Pacific had on exhibition yesterday two new sleeping cars—one a Pull-man and the other a colonial sleeper. The man and the finest of its kind run upon any of the transcontinents roads. Its advantage over the old car is its privacy. Each berth is made as private as those in a Pullman. Semicoring one from the other is a social slidbeparating one from the order is a sorie spin-ing headboard. Herefofore these divisions were made with screens, and as a conse-quence gave but little privacy. Each section is fitted up with curtains, hedding and a table. If a person does not supply his own for 33. This includes curtains, blankets, mattress, pillows, sheets and pillow cases. When the journey is terminated these become the personal property of the purchaser to dispose of us he may see fit. The tollet rooms are a great improvement over the old style. They are in fact the equal of those found in the ordinary Pullman. One end of the earl is fitted up as a kitchen, with a large ringe and ample water supply. In the other oud is a fire-proof Baker header. The new Pullmans are even a greater nevelty. They are without ample water supply: In the other and is a fire-proof Baker heater. The new Pullmans are even a greater movelty. They are without doubt the finest sloeping cars run upon any road. Each car has two state rooms—one a single and the other a double room. Each has its own private toilet room. The romainder of the car is attogether different from the ordinery sleeper. The tollet rooms are larger and much more private. In the old style of Pullman the gentlemen's toilet room has no pr vacy whatever. In these they extend across the car and are partitioned off so that one passing through the car so is nothing of the gentlemen making their toilet. Each car is supplied with het and cold water, and toe water us well. The water is carried in tanks beneath the car, and by a tew arrangement the necessity of pumping water for toilet purposes is done away with. The water is forced into the pipes by means of air pumps. Warm water is obtained by having the water pass through a coll of pipe encircling the heater. The drinking water passes through pipes upon which his placed a large quantity of ise. In the toilet room is an air gauge carrying the same amount of pressure in a tank boneath the car as in the drum under the engine. This constantly has sufficient pressure to keepirunning both hot and cold water, as well as ice water. The two water tanks be meath the care he cut off there is attached an air pump, which, by the manipulation of an employe, sufficient air can be forced into the tank to keep up a stream of running water for ten hours. In case of fire the car is supplied with hose which, attached to the follet room faucets, will give a Marcam sufficient from faucets, will give a Marcam sufficient. plied with nose which, attached to the total room fattects, will give a stream sufficiently heavy to check they ordinary blaze. The interior of the car's all hand finished, the triumings being in blue sitk glace. Altogether, if is the finest car yet turned out, by the Pallman shops.

lot of probibition cranks, devotes nearly four columns of space in its last issue to an article on Grand Ponde valley. The writer is very complimentary to Union in many respects, but the good effects of it o article are entirely destroyed by his attack upon This Oneconias and the misrepresentations made concerning that journal's position toward not only Union, but the entire county. It is cortainly news to learn through the Express pennya-liner that This Oneconian is gnashing its teeth over the prospects of the Huntraincad being cakended to this point. The Origonian has pot signified any opposition to the binding of the road, but on the contrary encourages the construction of railgays, in all parts of the state as one of the great means of developing its resources and inin all parts of the state as one of the freat means of developing its resources and in-ducing the thousands of immigrants coming westward to locate therein. It is just such intemperate and foot-written crucies that are drawbacks to any section of the state trying to build itself up and the statements made by the Express correspondent in no wise reflects the sentiments of the people of Union.

also noid \$1500 worth of goods, cash, one day offlowing this, and all three are doing a good business. Their stock of goods are navaluations. They is one furniture store, one bunk, we can be to the country. They is one furniture store, one bunk, we can be to the country. They is one of the country of the United States Goological Survey. Summary of the Report of the United States Goological Survey. Summary of the Survey. Survey. States Goological Survey. Summary of the Survey. Surv decrease of \$14.953.305 in value. Steel of all kinds gludward in 1883, 7.555 440 long tone; value at works, \$85000.505. This is a decrease from: 187.25 1500 in value. Total upot

value at works, \$850.05.501 towals quantity and of \$12.21.000 in value. Total pot value of \$12.21.000 as compared with 1887. Lime-stone.nsed as a flux in the manufacture of pig-tron in 1888, about 5.438,000 long toon; value at quary, about \$2.719,000.

Gold and silver—According to the director of the mint, the gold product was 1,003.227 fine ounces, valued at \$35,175,000. This is about the same as in 1887, being an excess of only \$75,000. The silver product was 45,783,632 fine ounces, of the commercial value of \$59,136,000. This is an increase of 4,518,327 comcas over the product in 1887. In addition to the product of our own mines some 10,000,000 ounces of silver were extracted in the United States from foreign ore and bullion. Copper.—The total product including the yield of imported ores, increased to 231,270,002,200 pounds, or 115,635, short tons, during 1888, which is 46,053,201 pounds more than the product of 1887. During the first quarter of 1889 the production was increasing at even a more rapid rate. The prices received by American producers averaged 15½ cents per pound for 2,8ke copper, 14½ for Arizona and 14 for other dustriots; making the total value \$33,833,934. Montana led in the production, making 97,887,988 pounds. Consumption was somewhat reduced by the high prices.

Land.—The preduct increased to 189,566 short tones from 180,700 tones in 1837. The increase was due principality to the heavier receipts of lead in Maximan silver-lead ores from 19,000 tones in 1837 to aver 27,000 tones in 1888. The average left of a further notable furcase in the production of zinc in 1838. The additions to capacity were fairly uniformly distributed in the West East and

Zino.—The exection of new works and the extension of old ones led to a further notable increase in the production of zine in 1388. The additions to capacity were fairly uniformly distributed in the West East and South. Production in 1888, 55,903 short tons, with a total value of \$5,500,855; in 1887, 50,340 tons, worth \$1,82,300. The production of zine white in 1888, directly from ores, was 20,900 short tons, worth \$1,601,000. Quickriver.—The product was 33,250 flasks (of 78½ pounds each) from California, a decline in that state of 510 flasks from 1887 in spite of a very satisfactory price, which averaged \$42.50 per flask, making the total value \$4,413,125. No new valumble deposits were discovered in 1888, and without them it is not probable that the yield of quickgilver will increase.

Nickel.—The industry remains unchanged except for indications of further development at Lovelock in Nevada and Ridile, Oregon. The product includes 190,637 pounds of metallic nickel, valued at \$114,382 at 50 cents per pound, and 4,545 pounds, worth \$1130, exported in oree and matte.

oregon. The product menuses 189,4382 at 50 cents per pound, and 4,645 pounds, worth \$1130, exported in ores and matte. Total value, \$115,518. The corresponding value in 1887 was \$133,200.

Colut oxide.—The total product, including the convens of the exported ores and matte, was 12,235 pounds, worth \$18,41. In 1887 the total was 18,340 pounds, worth \$18,774, the lower rate of value in that year resulting from a larger proportion of exported nickel in matte and ore. The price of coball oxide remained at \$2 per pound.

Chromium.—The product declined from

pound.

Chromism.—The product declined from 3000 tons in 1837 to 1500 tons in 1838. The average price in 8sn Francisco remained \$15 per ton. Increased operations are probable in 1839.

Manganese.—The product of manganese and manganiferous fron ores in the United States in 1868 was 239,400 tons, valued at \$876,215. Of this amount some 25,500 tons would be classed as manganiferous fron ores. Of the manganiferous iron ores. It does not seen a supposition or see 11,402 tons. would be classed as manganese bres; the re-mainder as mangantierous iron ores. Of the manganterous iron ores 11,462 tens, averaging 11 per cent, of manganese, and 189,574 tens, averaging 4 per cent, of man-ganese, were from the Colby mine, Michi-gan, In addition to the above, some 60,000 tons of argentiferous ranganese ores, val-ued at \$10 a ton, chiefly for the silver con-tained in them were produced in the Rocky mountain region.

policy with hose which, attached to the tollet from funcets, will give a stream sufficiently heavy to check they ordinary blaze. The interior of the car's all hand finished, the trimmings being in blue sitk giace. Altogether, if is the finest car yet turned out, by the Pullman shops.

\*\*UNFAIRLY STATED.\*\*

Eastern Oregon Republicae.\*\*

The Pacific Express, an obscure paper published at Pordland under the direction of a lot of probabilion cranks, devotes nearly four columns of space in its last issued on arrived on Grand Ronde valley. The writer is very compilinentary to Union in many respects, but the good effects of the article are entirely destroyed by his attack upon The Oragonias and the misrepresentations made concerning that journal's position toward not only Union, but the entire county. It's Ising than ever before for the production of

\$2000.

\*\*FCELS.

\*\*Coal.\*\*—The total production of all kinds of compercial coal in 1888 was 143 087,735 short tons (therease over 1887, 18,022,480 tons), values at the mines at \$204,221,690 (increase, \$30,625 094). This may be divided into Pennsylvania anthractic 43,922,897 short tons (increase 4,416,642 short tons), or 39,216,872 tong tons, including 38,145,718 long, tons shapped by the railronds and canals and reported by their statistician, Mr. John H. Jones, and 1,071,154 long tons sold to the local trade at the names (increase 3,913,430 long tons), valued at 480,640,649 (increase, \$6,284,405); all other coals, including bitumamous, brown westward to locate therein. It shall say in temperate and fool-written articles that are drawbacks to any section of the state trying to build itself up and the statepents made by the Express correspondent in no wise reflects the sentiments of the people of Union.

Advice to Presidential Candidates.

Mew York Sun.

Ullie Aberstrom, the popular and lively actress, he put into its most striking form at deep-down principle of life and business:

"Toot your horn I you don't sail a clam."

I thick in politics, too. Advertise yourself in mind. Nothing will come of it now, but perhaps if may pay hereafter. Toot your horn if you don't sell a clam.

Whittee Didn't offer Verses to Editors. Whitter Didn't sell a clam.

Whittee Didn't offer Verses to Editors. Whitter is likely to bive to be 100 years old. It should be remembered, however, by a mibitions verse-emakers that Mr. Whitter has never been dropped from the sixth story to a fund payement, A poet's good health offer depends unon cond fions.

the United States in 1988 was 27,346,618 bar-rels (of 42 galloin each), valued at about \$24, 598,559. Of this amount Panisylvanis pro-duced 16,491,933 befrels; "Ohio, 10,010,888 barrels; West Virginia, 119,448 barrels; Cali-fornia, 704,619 barrels; and other states 20,900 barrels.

fornia, 704,616 patrets; and other same barrets.

Natural Gas.—The amount of natural gas consumed is given in coal displacement; that is, the amount of coal displaced by the use of natural gas. It is estimated that the amount of coal displaced by natural gas in the United States in 1888 was 14,163,836 tons, valued at \$22,662,128. Of this amount 12.643,830 tons were displaced in Pennsylvania; 750,000 tons in Ohjo; and 660,000 tons in Indiana. STRUCTURAL MATERIALS.

Indiana,

STECCTURAL MATERIALS.

Building Stone.—Direct returns from producers of the various kinds of building stone show that there was but a small gain in value over the figures of 1887. The value of the stone produced in 1888 is \$25,500,000, or \$500,000 more than the preceding year.

Brick and Sto.—Value, \$48,213,000. This figure represents only a small gain over 1887. This is due rather to increase in the number of manufacturing plants than to increased production at the older and more important sources of samply; in fact, many of the latter shows stability of in production. Friends also were gain and the older and more fine in the latter shows stability of in production. Friends also were gained to the control of the production of the centing set of the stability of the production of the centing set of the first stability. These figures are not largely in advanced those for 1887, and the gains are not so much the results of increased production. In the leading lime regions as in location of minor importance.

ABRABIVE MATERIALS.

barrelajfor 1883, valued at 12% conts per outrei, making \$4.55,639 as the value of the
year's product.

Askasiva Materials.

Buhrstones.—The product which is used for
grinding cemept, plaster, paints, feed, etc.,
comes from New York, Pennsylvania sand
North Carolina, and is valued at \$150,000.

Grindstones—Ohlo and Michigan furnish,
practically all the sandstone from which
grindstones are made. The product in 1888
increased slightly, 47,000 long tons, worth
\$251,800, being produced, against \$7,400,
worth \$224,400, in 1887. The price varied
from \$6 50 to \$10 per ton at the quarries before being finished into, grindstones.

Gerandum.—Production is limited to the
old mines in North Carolina and Georgia;
\$89 short lons, lyulued at \$21,320, were produced in 1888 against \$00 tons in 1887.

Oldtones and whetlones.—The production
of novaculitis from 'Arkansas increased
slightly, making the total, including Labrader oilstone, etc. 1,500,000 pounds, valued at
\$18,000 th the rough state.

Precious stones.—No systematic mining
was certed on in sesseth of genus in 1888.
But in lumining for other substances and in
chance discoveries, genus worth \$46 530 in
the rough state. The production declined
to 433,300 long tons, but the total units increased slightly to \$1,831,673 on jaccount of
better prices. The trade in manufactured
fertilizers was very prespersons.

Maris.—The production in the Southern
states, particularly in Virginin, North Carolina, Alabamb, Mississippi, and Florida, 'is
increasing, while the product of New Jersey,
did not vary from 1887. About \$30,000 tons,
valued at \$300,000, were produced, M £ 3

Salt.—The industry shows only slight
changes: In 1888 the production was \$450.581
barrels of 280 pounds, waited at \$43,000 tons
valued at \$500,000 pounds, and in the southern's
states, particularly in Virginin, North Carolina, Alabamb, Mississippi, and Florida, 'is
increasing, while the production was \$450.500

barrels with a production was restricted to
7,689,000 pounds, worth \$451,340, at six cents
pe

was partially burned. This and litigation over the property preyented any prod action in 1838. The supply came principally from Sicily, with small importations from Japan. Pyrite.—Production, 64,331 long tons, valued at the mines at \$157,658, a slight increase in quantity over the previous year.

Eurytes.—The production from Missouri. Virginia and New York increased to 20,000 long tons, worth at the mines \$110,600. In 1887 the product was 15,000 long tons, worth \$75,000.

Gyps m.—The domestic supply comes principally from Ohio and Michigan, with smaller amounts from New York, Virginia, Kansas, Colorado, California, Dickota and Utah. The product of 1888 was 96,000 tons of crude gypsum, yalugd at \$120,000; A large portion of the supply is imported from Nova Scotia, where 126,118 tons, worth \$121,579, were produced in 1888; Ozoorite.—From the region of Soldier's Summit, Utah, about 20,000 pounds of crude mineral wax were produced, worth \$1000 in New York, where the material was sold. An

New York, where the material was sold. An increase is probable in 1889.

Scapatone.—Production, about 15,000 tons: worth \$30,000 before shipme at.

Asphaltum.—The product of 1888 includes 700 tons of elisante mined in Utuh; 3000 tons of ordinary asphaltum; principally from California, and 50,000 tons of bituminous rock quarried in Ca ifornia for pavements in competitition with asphaltum; total value, \$331,500.

Fold-par,—The consumption for potters' use declined to 8700 long tons, worth, in Tronton, New Jersey, \$30,000. In 1887 10,200 long tons were produced, worth \$56,100.

Film.—For potters' use, the consumption was 16,200 long tons. Including hat for sandpaper and for glass, the education product was shout 30,000 tons, worth, in ground, \$175,000.

Potter's clay.—The consumption included

sandpaper and for glass, the ednamption was about 30,000 tons, worth, ur ground, \$175,000.

Fotter's clay.—The consumption included 18,000 long tons of kaolin or china clay 550 tons of ball clay, and 13,000 tons of fire clay, worth altogether \$300,000.

Mica —Owing principally to the use of similar sizes in stoyes the production of sheet mica decreased from 70,500 pounds in 1887 to 48,000 in 1888, valued at \$70,000. There is increased demand for mica waste.

Mineral paints.—The product, including other, metallic paints, and small amounts of uniter and sieman, increased to 24,300 long tons, waited at \$300,000.

Graphite.—The production of pure graphite was limited to Ticonderogs, New York, and is reported as unchangul. The total productions of pure material was 400,000 pounds, worth 433,000. Small smooths of less pure material for founcry facings, etc., were produced in North Carolina, and at Cranston, Bhode Island.

Fluorogar.—The production, limited to the neighborhood of Roseclare, Hilmoils and Evansville, Indiana, is reported at Oxfo tons, worth 230,000, an increase of 1000 tols over 1897.

Infaroral earth.—The product come prin-1897.

Influential earth.—The product come principally from Maryland, and amounted to 2500 short tons, worth, before shipment.

\$12,500. Zircon.—During 1897 and 1883, twenty-five

Zircon.— During 1887 and 1883, twenty-five tons of zircon were mined, principall in Henderson county, North Carolina, and sold for \$10,000 for the manufacture of incandescent gas burners. Atout four tons of moinszite, one ton of allanite, \$000 pounds of sumarskite and \$100 worth of yttrium minerals were prodused for the same use. About six tons of monasite and live tons of certle were also imported.

Mineral suters.—Amount sold in 1888, 9,628,568 gallens, valued at \$1,709,302. In 1887, the product was 8,259,600 gailons, worth \$1,261,473.

Totals.—The total value of the minerals produced in 1888 was \$201,630,931. It is recognized that this is the sum of the value of substances taken in various stages of manufacture and hence not strictly comparable with each other; still it is the most value of different years. The result is an increase of rearly \$50,000,000 beyond the value of the product in 1887. In that year nearly every minerals industry showed an increase, and hence an increased total was evident. But the fact that the increase exceptional conditions an a few increasing the expected that a similar combination all years would result in given a few increasing the exceptional conditions on a few increasing the exceptional conditions of a few increasing the exceptional conditions of a few increasing the exceptional conditions of a few increasing the expected that a similar combination of circumstances would result in even a few increasing the exceptional conditions are severed.

value of the anthreadis, or in the total too.

nage of the bituminous coul.

Care—The production of coke in the total ton.

United States in 1888 was 8,527,590 tans, valued at about \$14,000,000. Penasylvania for the product the interest the connells like region alone producing 4,955, connells like region alone producing 4,955, tons; West Virginia, 528,533 tons; Alebana, 518,516 ons; Tennesse, 335,635 tons, and Virginia, 149,099 tons.

Petrolaum—The product of petroleum in the United States in 1868 was 27,846,016 barrels (of 42 galloin eace), valued at about \$24, 598,550. Of this amount Punsylvania produced 16,491,033 barrels; Olio, 10,010,838 berels; Olio, 10,010

ANOTHER DANGEBOUS DAM. People of Olean, N. Y., Live in Constant.

People of Oran, N. Y., Live in Constant Drand.
Olean (N. Y.) Special to chicago Tribune.
The Cubarreservoir or Guba lake, as it is known, to-day, was built as a feeder for the old Genesse valley canal years ago. It is located about one mile an Is half above the village of Cuba, fourteen miles northwest of this city, on a direct stream passage from the reservoir to this city. The reservoir contains at low water mark 1600 acres of water, and when the mountain streams add their flow of water to the late it increases the flood to 2000 seres of water, making the largest hody of water centained behind a dirt embankment in the United States. The reservoir is kept up and used for a summer resort and lightsh pond, and no attention is paid to the welfurlo of the public. All that the managers care for is to draw people there in the summer mouths to spend their money.

the managers care for its to draw people there in the summer mouths to spend their money.

The lake my reservoir is conted in a valley between mechanistic hills and is fed by a number of small streams that flow down from the neighboring hills and valleys. In summer the take is safe cooling, but when rains raise the wither in the small streams it becomes a regular whirippol.

When the state cared for this reservoir it was kept with gates that would allow the surplus water to escape, but an recent years not much, if any attention has been paid to the gates, and the dunger has grown each year. The extent of this large artificial hody of water is twe miles and hindit long by a mile and a half wite, and the depth is, on an average, sixth-two feet. The mud bank that keeps this vast body of waver back from the valley below is about twe-eighths, of a mile long, forty-five feet, wide at the hottom, twenty feet wide at the top, with a wagon road on the same.

For many sears the reservoir has been a mennee to the people of the villages of Cuba, Hinstale, Black Creek, Belfast, his city and the surrounling goountry, resat each spring freshet there was danger of the dan giving away.

A few years are the subbulkment eave

away.

A few years ago the embankment gave away in the hot njoht of July, when there was no flood, and caused great damage, flooding all the villages along the river for over a hundred miles. The break was repaired and he lake this grown larger since. At the present time people who live near the reservoir huye moved away, and all the inhabitants below this vast lake are affuld to leave their hanges for feat they may never meet their families again. The dread is betwe their houses for fear they may never meet their furnities again. The dread is widespread and no one in the entire valley feels safe or will feel safe until this vist body of water is gradually allowed to escape. Watchinen are on guird klay and night at the dan to give warning it case there should be signs of a break.

All the local papers are foully calling upon the state authorities to close up the lake or the people will take the matter into their own hands. Late reports state that the dam is apparently safe. The board of trade of this city to-night bonderns the reservoir. If the dam breaks it will flood the entire Alleghany valley, as far as Pittsburg, and great loss of life will occur.

FORCE OF EXAMPLE.

Husband—It is true, Maria, I sometimes go out and take a social glass with a friend. Associated is I am in business with men who drink occasionally, and Laving for my acquaintances and intimate friends chiefly those who are accustomed to drinking in moderation, I caunct well avoid following their example once in a while without appearing unsocial.

Wife—Go-lee! Christopher Beeswax! Confound the litek to thunder! Saw my blamed hoad off, if I——
Husband (in instinishment)—Are you crazy, Maria? What do you mean by such language?

crazy, Maria? What do you mean by such language?

Wife—I am only talking as you do, John, if you step on a tick when you get up in the morning or run a splitner, under your finger nail in making a file. Associated as I am, John, in close relations with a man who talks in this style, I adnow well avoidifollowing his example concein a while without appearing unacial. Whoon! Darn it all? The baby has smenred nicknesses candy on this beastly door knob again—

Husband (humbly)—I'll sign the pledge to-morrow, Maria.

Husband thumbly) It sign the pledge to-morrow, Maria.
